

THE MOST FLEXIBLE & POWERFUL PROCESS, PROJECT MANAGEMENT PLATFORM

Digital Transformation Ecosystem
Common Data Environment (CDE)
Unified Project Delivery
Business Intelligence (BI)
Secured Cloud Computing
BIM

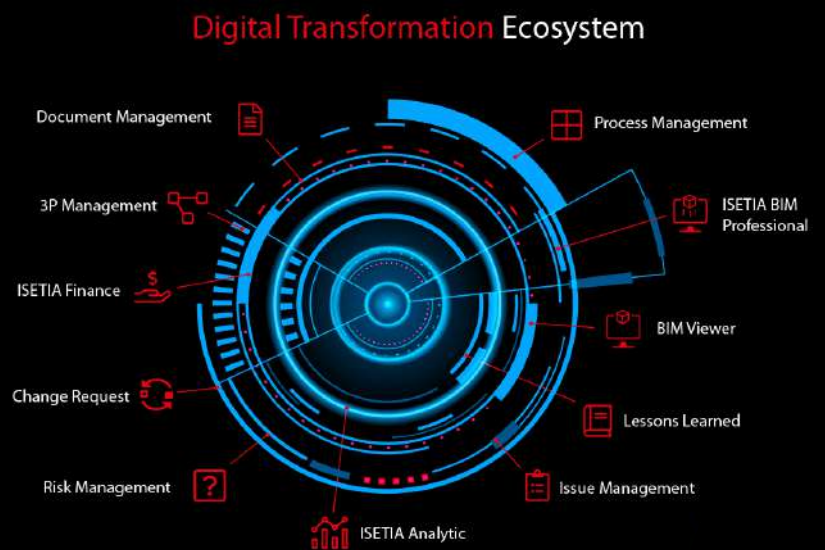

Single Source of Truth

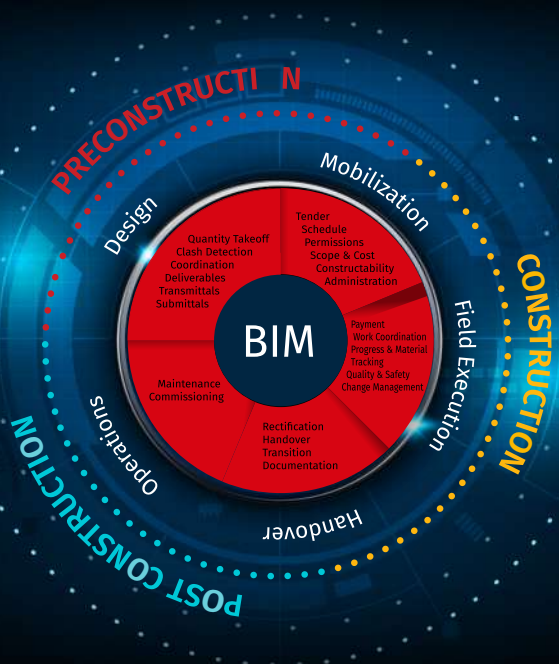

COMMON DATA ENVIRONMENT is the single source of information used to collect, manage and disseminate documentation, graphical and non-graphical data for the whole project team. ISETIA CDE platform helps to resolve data overload, inconsistent workflows and data loss. ISETIA promotes common processes, workflows, standards and data access.

Digital Transformation Ecosystem

ISETIA is modular in nature, meaning that it is composed of independent modules that can be configured to create a solution that perfectly fits the needs of each project. Each module of ISETIA addresses specific requirements of different stages of construction, from pre-construction to post-construction.

Unified Project Delivery

Unified Project Delivery

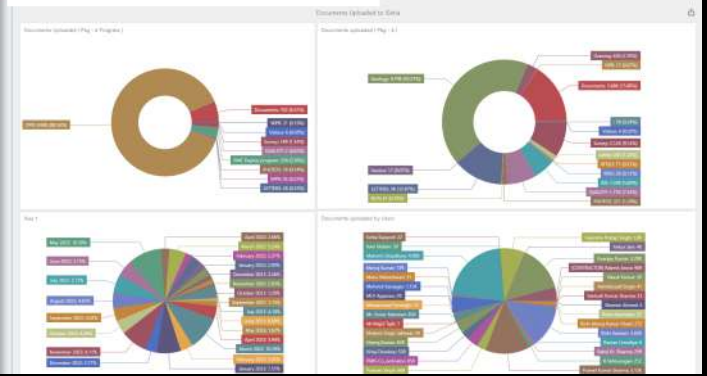

ISETIA is your comprehensive solution for Building Information Modelling (BIM) across all stages of construction, including pre-construction, construction, and post-construction. Our platform offers critical assistance during the design phase, such as quantity takeoff, clash detection, coordination, deliverables, transmittals and submittals.

Advantages of ISETIA

- ▶ Achieve single source of truth ▶ Dashboard / BI Reporting including GIS reports ▶ Pro-active measures against issues and problems
- ▶ Integrated system with BIM Collaboration ▶ Increase quality of work ▶ Measure accurate project progress ▶ Achieve project control
- ▶ Gain clear project visibility ▶ Decrease time to search information for meetings ▶ Gain insights into overall project health

Who are we ?

- KL iTech Solutions specializes in providing software solutions for AEC (Architecture, Engineering & Construction), Energy and Infrastructure customers
- Focused on Project Management, CDE & Cost Estimation solutions to enable Digital Transformation for projects
- Tie-ups with global software technologies – Trimble TILOS, ISETIA, CostOS, Powerproject
- Over 15+ years' experience in Architecture, Engineering & Construction (AEC) sector
- Over 300+ customers in AEC sector
- Deliver technology, consulting, training & support services

Why KL iTech Solutions?

- Successfully implemented project management software solutions in more than 50+ projects across India
- Strong team of domain & technology experts
- Pro-active & customer-oriented approach
- Our commitment to excellence is reflected in our ISO 9001:2015 certification for sales, support, training and implementation services
