

It is the fastest & easiest Measurement Takeoff software. The feature-rich environment includes the ability to measure area, linear, non linear, count and metric footage, pitch and angles, and see-through and comparative plan overlays, as well as the ability to email plans, update them, and even store them using industry-standard CAD and image files.

Natural Estimating

Digital estimating software speeds up the process so you can finish your bids in half the time. It would have taken to finish a takeoff and estimate by hand and reduced it to a quick and easy process. With our single-click tool we have taken it a step further, with a single click you can complete areas and count items.

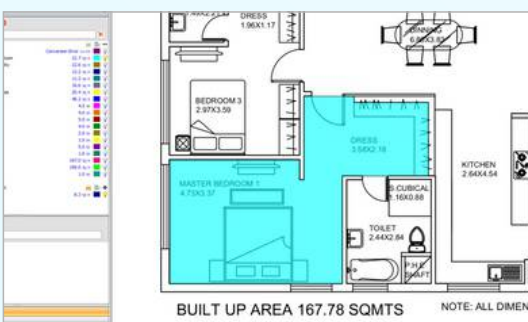

Excel integration

Direct integration of excel with planswift helps to share the takeoff template and phraseologies. It helps to follow your existing excel formulated template with planswift estimated quantities. It has interactive excel spreadsheet program. It also has an option to extract the measurements to excel.

Layouts

Planswift has more useful predefined templates for contract work, masonry, Flooring, Electrical, Hvac, Landscaping, painting & more trades. Predefined layout and templates reduce time for takeoff and generating estimates. It has own interactive worksheet with different layouts.

Scale Correction

Rescale dimension of the drawings in seconds. Now you can scale any digital drawing easily, Once the page is scaled, you can click any two points on the drawing to calculate measurements - providing far more accuracy than a scaling ruler.

Overlay

Easily find what changes on plan revisions! Compare new & old versions of the same drawings and instantly pinpoint changes. Overlay helps to visualize the changes in the drawing to reduce time.

Reporting

Planswift helps to produce standard / customized, professional reports, including Bills of Quantities, Quote summary, price summary, templates and Cost Plans.
