

THE RIGHT TOOL FOR THE JOB

iTWO costX® is the complete 3D/BIM and 2D estimating solution.

- ✓ Supports **scanned, PDF or CAD drawings** and **3D/BIM models** – all without the need to buy CAD software
- ✓ Supports **BIM** by using digital design data to **accurately** estimate quantities and costs
- ✓ Powerful spreadsheet based workbooks are **live-linked** to the drawings
- ✓ **Codes and zones** allow work to be sorted and regrouped
- ✓ **Workbooks** can be **linked** into user-defined rate and constants libraries
- ✓ Unique **revision mode** **compares drawings** and highlights the changes to identify revisions and update quantities
- ✓ Report writer produces **customised** professional reports
- ✓ **Subcontractor comparison** workbooks can be generated with associated reports
- ✓ **Network** capabilities allow **multiple users** to work on the same project at once
- ✓ Free iTWO costX® viewer allows others to view your estimates and reports **without paper copies**

iTWO costX® enables you to quickly and accurately take off quantities from 2D drawings and generate automatic quantities from 3D/BIM models using the most advanced electronic takeoff system available. Prepare estimates, bills of quantities and tenders easily and all in a fraction of the time and cost!

Why iTWO costX®?

iTWO costX® is the total takeoff & estimating package. More companies are using iTWO costX® for their complete estimating solution and are demonstrating strong returns on their investment. iTWO costX® is a powerful project costing tool that enables estimators to utilise the most advanced electronic takeoff system while embracing BIM to deliver better results to clients. It can reduce take off time by up to 80%.

Also available ... iTWO costXL allows you to use Excel® spreadsheets to work with construction data.

The iTWO costX Family of Products

■ iTWO costX®

iTWO costX® is the total takeoff & estimating package. More companies are using iTWO costX® for their complete estimating solution and are demonstrating strong returns on their investment. iTWO costX® is a powerful project costing tool that enables estimators to utilise the most advanced electronic takeoff system while embracing BIM to deliver better results to clients. It can reduce take off time by up to 80%.

■ iTWO costX® 2D

iTWO costX® 2D does not support 3D/BIM drawings or allow for auto-revisioning, but still contains our world-leading 2D takeoff and integrated workbook. If your company does not receive 3D/BIM drawings but still wants to take advantage of the faster, smarter and more accurate estimating solution on the market, iTWO costX® 2D is the best choice for you.

■ iTWO costX® takeoff

If you only require iTWO costX® for measuring, purchase iTWO costX® takeoff and still utilise the most advanced takeoff system on the market. iTWO costX® takeoff not only supports a variety of 2D drawings but also supports 3D/BIM models. Reduce your costs and use the best tool for the job.

■ iTWO costX® takeoff 2D

iTWO costX® takeoff 2D is great for those new to digital, as it still allows you to use the world-leading 2D takeoff, meaning you can measure areas, lengths and counts in a few clicks. If you have only used manual measurement and Excel® before and want to start off with something simple, iTWO costX® takeoff 2D may be the best choice for you.

FEATURES	iTWO costX®	iTWO costX® 2D	iTWO costX® takeoff	iTWO costX® takeoff 2D
